SUBSCRIPTION DOCUMENT FOR SaaS-BASED URL QR CODE GENERATOR SYSTEM

Dear Sir/Madam,

We are pleased to offer our **SAAS-based URL QR Code Generator System**, designed to enhance the efficiency, transparency, and document management of testing laboratories, calibration laboratories ,RMP facilities or related businesses.

This document outlines the available subscription plans and their associated features.

All Testing laboratories, Calibration laboratories ,RMP facilities or related businesses. are recommended to opt for technology solutions designed to empower seamless document tracking through our system.

With this cutting-edge application, businesses can now generate **ULR numbers and QR codes** for test requests, calibration certificates as per NABL Accredited scope or other documents required verification and digital archival with the help of our technology

Objectives:

The **primary objective** of this system is to enhance efficiency and transparency in business operations by:

- Providing business with a **simple yet powerful tool** to track and manage their reports/documents seamlessly.
- **Generating unique identifiers** for each test request, calibration certificate or related documents to streamline communication with end-users.
- Integrating seamlessly into existing lab processes ensuring compliance with industry standards and regulations.
- Enabling an **online verification process** of reports issued via **ULR number**, allowing verification of generated ULR numbers without disclosing report content.
- Facilitating **Online Report Verification via QR Code**, ensuring that users receiving the report can validate its authenticity by scanning the QR code, thereby eliminating fraud and enhancing credibility.

Note:

- Businesses retain responsibility and ownership of the content issued through the system, maintaining full control over their documentation.
- The system is designed to improve tracking and control over documents issued to the public by businesses, thereby enhancing transparency and accountability in business operations.
